FOREWORD

With the participation of the Selcuk University Institute of Health Sciences Administration and our external stakeholders, the "Institute of Health Sciences Graduate Education Evaluation and Update External Stakeholder Meeting" has been successfully completed. With the valuable contributions of our esteemed Rector, Prof. Dr. Metin AKSOY, and our Vice Rector, Prof. Dr. Ahmet Tuğrul POLAT, who also serves as the Coordinator of the Quality Board and Quality Commission, discussions were held on the current status of our Institute, improvement suggestions, methods, and the necessary approaches to enhance quality within the scope of accreditation

Institute Council meetings were held, and support from department chairs was obtained to initiate curriculum update efforts in graduate education and to ensure rapid compliance with both ORPHEUS and YÖKAK institutional accreditation processes. In light of the qualitative and quantitative data presented in the 2022 Self-Assessment Report, our Institute's Mission and Vision have been updated. Additionally, it was decided that the Education and Training Committees, established in the 2021-2022 academic year, would hold periodic (semesterly /annual) meetings to lead internal and external activities.

This report has been prepared to present the discussed agenda items and decisions to all our stakeholders. On behalf of the Institute Administration, I hope that this report will be beneficial for graduate education and training

Prof. Dr. F. Hümevra YERLİKAYA AYDEMİR
Director of The Institute of Health Sciences

SELCUK UNIVERSITY INSTITUTE OF HEALTH SCIENCES POSTGRADUATE EDUCATION EVALUATION AND UPDATE EXTERNAL STAKEHOLDER WORKSHOP

AGENDA

- HOW WE STARTED?
- WHAT PROGRESS WE HAVE ACHIEVED?

- In order to support student's scientific preparation for the thesis process, it has been decided that the course titled "Research Topic Related to the Thesis" will be offered as a mandatory course for two semesters. Additionally, nine elective courses have been added to the curriculum for all graduate students, The implementation will begin I the spring semester of the 2022-2023 Academic year.

- To create a corporate identity English access has been provided for all menus on our newly created website

- Institute data (Number of students, of number graduates number of new enrollments, number of students receiving additional time, etc.) continue to be shared transparently on the website .

- With the graduate workflow diagrams published on the website, the education process has been made more understandable and guiding for students

- The process of graduate student recruitment was started with the end of the current semester: the average ALES/ LANGUAGE scores of the students admitted in the early period have increased and more qualified students have been recruited.

- ORPHEUS (Organization of PhD in Biomedicine and Health Sciences European System), which aims to develop and disseminate basic standards and best practices in Doctoral Education in Biomedicine and Health Sciences to raise the standards of the qualifications that graduates of doctoral programs will have and recognize the diplomas internationally it was included in the previous report that we as the Institute applied to the organization on 25 June 2021 Between 2021 and 2024 educational revisions have been accelerated and with the field visit planned by the authorities in June 2025 another significant step will be taken towards obtaining accreditation.

ORganisation for PhD Education in Biomedicine and Health Science in the European System

- The scientific committees established to improve graduate education continue their work to ensure more systematic progress.

- Quality studies have been initiated under the Institutional Accreditation by

YÖK-AK for our graduate education and currently ongoing.

In order to fully ensure representative democracy, graduate students elected master's and PhD student representatives, and their participation in the Board of Directors meetings was ensured. Additionally, their opinions and suggestions were taken into consideration.

- In order to identify the thoughts, opinions and tendencies of our students in graduate education, as well as to identify our strengths and weaknesses, four different topics that will provide feedback in a certain regularity survey was prepared and published online.

- An internal stakeholder meeting was held in the ORPHEUS and University Institutional Accreditation process to effectively address expectations and demands related to education and training practices and program /student competencies. The feedback and

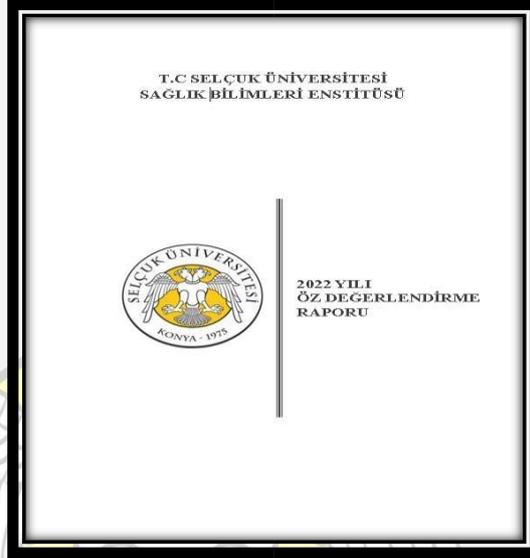

suggestions gathered were implemented.

- To ensure a more effective and efficient implementation of the ORPHEUS and Institutional Accreditation process and to inform students about the education process and regulations, the Student Orientation Program I / II was organized in 2022 and has since been made a continuous practice.

- By examining the activities, we carried out at the institute level, we evaluated our strengths and weaknesses. To ensure easy access to information, we shared the Self-Assessment Reports on our website.

- Within the scope of ORPHEUS and Institutional Accreditation, the issue of offering the courses 'Thesis-Related Research Topics 1 and 2' to all students was decided upon by the Institute Board, and it will be implemented in the 2022-2023 Spring Semester

WHAT TO DO NEXT;

- Getting the ORPHEUS label,
- Receiving YÖK-AK Institutional Accreditation,
- Organizing consultancy training sessions,
- Making necessary arrangements and improvements as a result of survey feedback.

EXTERNAL STAKEHOLDER WORKSHOP RECOMMENDATIONS

The mission and vision of our Institute of Health Sciences have been organized as outlined below.

Mission of the Institute of Health Sciences: "To train qualified scientific experts and specialists in the field, who will contribute to science at national and international levels in the field of health sciences, with entrepreneurial, innovative, self-confident, courageous, questioning, open to universal knowledge, independent, and creative thinking, possessing contemporary and scientific thought."

Vision of the Institute of Health Sciences: Vision of the Institute of Health Sciences: "Our mission and vision, which aim to continue as stated below: producing knowledge that contributes to science at an international level, training students to become courageous, independent, and creative thinking scientists and experts, and maintaining its status as an ideal institute with pioneering and innovative practices in education and research for future generations

The General Directorate of TİGEM, one of our external stakeholders, has been consulted regarding the advisory board contributions for doctoral students who work in businesses and are involved in livestock activities related to Tigem/Tagem. Opinions were shared on the possibility of the signing institutional protocols, creating frameworks, and providing BAP support.

Among our external stakeholders, the Konya Veterinary Analysis and Control Institute stated that notifying the relevant parties in writing before the deletion of registration at the end of each term by our Institute, and finalizing the registration process after obtaining legal justifications, is an innovative approach in terms of institutionalization. They also emphasized that granting students the right to choose their advisors contributes to the educational process in terms of adaptation and scientificity.

One of our external stakeholders, the Institute of Health Sciences at Erzurum University, has suggested that using the placement score of students as a basis for advisor selection is helpful in planning the maximum number of advisors. They also proposed that the requests for advising and course offerings could be made online.

One of our external stakeholders, the Directorate of Institute of Health Sciences at Marmara University (which also serves as the ORPHEUS Turkey Embassy), stated that preparing the Self-Assessment Report is an important awareness-raising activity and provides an opportunity for development and reflection.

One of our external stakeholders, the Directorate of Institute of Health Sciences at Gazi University, stated that standardizing the innovations made is important and that collaboration will contribute to this process.

The meeting concluded with the collection of feedback, suggestions, and satisfaction from all our external stakeholders regarding the innovations made by our Institute. Additionally, they were asked to fill out the External Stakeholder Survey, which was published on our website.
